

AISHWARYA NAYAK

AI Engineer | Generative AI | LLM Systems | Agentic AI | AI Evaluation & Benchmarking

Bengaluru, India | +91 89894 38322 | ashnayakwork@gmail.com | LinkedIn: <https://www.linkedin.com/in/aishwarya-nayak/> | GitHub: <https://github.com/A1SHWARYANAYAK> | Portfolio: <https://a1shwaryanayak.github.io/>

SKILLS

AI & GenAI: LLM Evaluation, AI Benchmarking, Agentic AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Multi-Agent Systems, LangGraph, LangChain

Languages: Python, Scala, Java, SQL

LLM Stack: ChromaDB, Sentence Transformers, Ollama, Qwen, Vertex AI, Gemini

Backend & APIs: FastAPI, REST APIs, Microservices, Apache Kafka

Cloud & DevOps: Docker, Kubernetes, AWS, GCP, Jenkins, CI/CD

Tools & Frameworks: Git, Linux, MCP, n8n

Concepts: Distributed Systems, Event-Driven Architecture, Scalable System Design

EXPERIENCE

Handshake AI — AI Evaluation Engineer

Remote (US & India Projects) | 2025 – Present

- Designed and evaluated 500+ benchmark tasks and adversarial test cases for frontier LLMs and AI coding agents across reasoning, software engineering, and multimodal domains.
- Built reproducible Docker-based evaluation environments and automated grading workflows to support deterministic assessment of AI systems.
- Analyzed 1,000+ model outputs and agent trajectories, identifying failure modes, benchmark contamination risks, and reliability gaps.

Reality AI Lab — Generative AI Engineer (Volunteer)

Remote (US) | 2025 – 2025

- Developed AI-powered presentation generation workflows for MarvelAI using Google Vertex AI and Gemini 1.5.
- Built FastAPI pipelines and React-based interfaces supporting AI-assisted content generation and interactive slide editing.
- Benchmarked and optimized response quality, content relevance, and presentation consistency.

Mocapay — Software Engineer, Backend

Remote, India | 2021 – 2023

- Developed and maintained reactive Scala microservices supporting fintech products generating \$10M+ in annual revenue.
- Built REST APIs and Kafka-based event-driven workflows to improve scalability, reliability, and real-time transaction processing.
- Reduced deployment turnaround time by 30% through CI/CD automation using Jenkins and Docker.

Tata Consultancy Services (TCS) — Software Engineer, Backend

Indore, India | 2020 – 2021

- Developed backend services and financial workflow modules using Java, SQL, and AngularJS for enterprise finance platforms managing 1,000+ active contracts.
- Optimized AWS/GCP infrastructure and SQL workloads, improving performance while reducing operational costs by 15%.
- Automated testing and deployment pipelines using Jenkins and implemented secure development practices with Fortify and SonarQube.

PROJECTS

Enterprise Knowledge Copilot | RAG-Based Enterprise Knowledge Assistant

- Built an end-to-end Retrieval-Augmented Generation (RAG) system with document ingestion, vector search, semantic retrieval, and source-grounded question answering.
- Designed scalable retrieval pipelines using ChromaDB and Sentence Transformers for enterprise knowledge discovery across unstructured documents.

CodeSage | LangGraph Multi-Agent Repository Intelligence Platform

- Built a LangGraph-powered multi-agent system performing Architecture, Quality, Security, and Dependency analysis of GitHub repositories.
- Implemented LangGraph workflow orchestration, GitHub integration, structured Pydantic outputs, and automated Markdown report generation.

EDUCATION

Master of Science in Data Science

University at Buffalo (State University of New York, SUNY Buffalo)

2023 - 2025

New York, US

Bachelor of Technology in Electronics and Telecom Engineering

Symbiosis International University

2015 - 2019

Pune, IN
